SECTION - A: INTRODUCTION

A.1. Background

- 1.1.1. The erstwhile Gujarat Electricity Board has been restructured into seven companies. One generation (GSEC), one transmission (GETCO), four distribution companies (DGVCL, MGVCL,UGVCL &UGVCL) and Holding Company GUVNL in terms of Gujarat Electricity Industry (Reorganization &Regulation) Act-2003.
- a) Gujarat Urja Vikas Nigam Limited (GUVNL) to do co-ordination activities among all subsidiaries
 - b) Gujarat State Electricity Corporation Ltd. (GSECL) manages the electricity generation business of erstwhile GEB.
 - c) Gujarat Electricity Transmission Corporation Limited (GETCO) to manage the electricity transmission and bulk supply business of erstwhile GEB. All Substation 66 KV/11, 132KV/11KV, 220KV/11 KV are under control of GETCO.
 - d) Uttar Gujarat Vij Company Limited (UGVCL) to manage the electricity distribution and retail supply business of erstwhile GEB in North Gujarat region.
- 1.1.2. On 22-07-2019 Ministry of New and Renewable Energy, Government of India announced Guidelines for Implementation of Pradhan Mantri Kisan Urja Suraksha evem Utthan Mahabhiyan (PM KUSUM) Scheme for installation of solar pumps and grid connected solar power plants through three components, viz.
- Component A: Decentralized Ground Mounted Grid ConnectedRenewable Energy (RE) based Power Plants of individual plant size up to 2 MW.
 - Component B: Installation of standalone Solar Powered AgriculturePumps
 - Component C: Solarization of Grid-connected Agriculture Pumps - individual
- 1.1.3. Subsequently on 04 December 2020, MNRE introduced and issued guidelines for implementation of **feeder level solarization under Component-C** of PM-KUSUM Scheme. Under the scheme, agriculture feeders already segregated or, feeders having major load for agriculture may be solarized using installation of grid connected solar power plant to cater the annual power requirement of feeder(s). This will lead to lower cost both in terms of lower capital cost and cost of power. The Scheme guideline is available on MNRE's Website www.mnre.gov.in and GUVNL's PM-KUSUM Portal <https://pmkusum.guvnl.com>.
- 1.1.4. As per MNRE guidelines for feeder level Solarization, the requirement of total annual power for an agriculture feeder(s) is to be assessed and a solar power plant of capacity that can cater to the requirement of annual power for that agriculture feeder(s) can be installed either through CAPEX model or RESCO model, which will supply solar power to that feeder(s). **Under this Tender/RfS the feeder level Solar power plant/s is/are required to be installed under the RESCO model.**
- 1.1.5. As per MNRE guidelines for feeder level solarization, for installation of feeder level solar power plants through RESCO model, the SPGs will be selected on the basis of lowest tariff offered for supply of required solar power for a period of 25 years (unless extended by both the parties on mutual agreement). The developer will get CFA @ 30% of the estimated cost of installation of solar power plant i.e. **Rs. 1.05 Cr/MW (30% of Rs. 3.5 Cr/MW).**
- 1.1.6. As per MNRE's Scheme guideline for Feeder level Solarization, for the purpose of calculating CFA, the cost of installation of solar power plant has been estimated as Rs. 3.5 Cr/MW. Under the Scheme solarisation of pumps of any capacity is allowed, however, in case of pumps of capacity above 7.5 HP, the **CFA will be limited to solar capacity for 7.5 HP pumps.**

A.2. Objective

- 2.1.1. UGVCL intends to select competent, experienced and eligible bidder, hereafter to be referred as "Solar Power Generator" or, SPG, for the work of design, survey, supply, installation, testing, commissioning, operation & maintenance of grid connected solar power plants of

different capacities for various feeders of associated Sub-stations, its associated 11kV line to connect the plant with concerned substation and Remote Monitoring System (RMS) of solar power plant through RESCO model for 25 years (unless extended by both the parties on mutual agreement) for Solarization of various 11kV feeders associated with various 66/11kV substation in UGVCL under PM-KUSUM scheme – Component C (feeder level Solarization) as mentioned in the Annexure K20.

Note:-

- i. **For the multiple feeders emanating from same sub-station and covered under this project, the sum of solar plant capacities of individual feeder is to be considered for installation of single solar power plant for the capacity indicated against the group of feeders in the substation.**
- ii. **In case, two groups of feeders are covered under the same substation, there will be two separate Solar plants for each groups of feeders. These two solar plants shall not be in adjacent to each other for a same SPG.**

A.3. Model of execution of project

- 3.1.1. The feeder level solar power plant is to be installed in **RESCO model in the Solar Power Generator's land** along with its associated **11kV line** to connect the plant with concerned 66KV/11 KV substation at 11 KV Bus and RMS of solar power plant. Detailed scope of work mentioned in Clause D.1.
- 3.1.2. **The basis of evaluation of the bids shall be the levelized tariff for 25 years in Rs. Per kWh quoted in the Price Schedule against each feeder separately.** To further clarify, all the costs, distribution losses up to the delivery point including applicable taxes (incl. GST and cess as applicable), duties, etc. pertaining to design, survey, supply, installation, testing, commissioning, operation & maintenance of grid connected solar power plant, its associated 11kV line to connect the plant with concerned substation and RMS of solar power plant, shall be inclusive in the Price Bid quoted by Bidders for the purpose of comparison and evaluation. 3.1.3. **There shall be no year-on-year reduction on the Guaranteed CUF during the 25 (twenty-five) year's period.**

3.1.4. Right to Contracted Capacity & Energy

UGVCL, in any Contract Year shall not be obliged to purchase any additional energy from the SPG beyond the contract capacity. If for any Contract Year except for the first year of operation, it is found that the SPG has not been able to generate and supply minimum energy of **as mentioned against each Solar power plant as mentioned in Annexure K20 in KWH (Units) (corresponding to 19% minimum CUF) for respective Feeder(s) level Solar plant** during the term of the agreement, on account of reasons solely attributable to the SPG, the non-compliance by SPG shall make the SPG liable to pay the compensation. UGVCL shall not be obliged to purchase energy in excess of maximum CUF of 30% during any contract year. If UGVCL decides to purchase the excess energy beyond CUF of 30%, the payments for such excess energy shall be made at 75% of the PPA tariff. For the first year of operation, the above limits shall be considered on pro-rata basis. The lower limit will, however be relaxable by UGVCL to the extent of grid non-availability for evacuation which is beyond the control of the SPG.

This compensation shall be applied to the amount of shortfall in generation during the Contract Year. The amount of such penalty would ensure that the UGVCL is offset for all potential costs associated with low generation and supply of power under the PPA. **The compensation payable to UGVCL by the SPG shall be 25% (twenty-five percent) of the cost of this shortfall in energy terms, calculated at PPA tariff.** This compensation shall not be applicable in events of Force Majeure identified under PPA.

At any point of time block, the peak of capacity shall not reach higher than the contracted capacity at the point where power is injected in the grid. The SPG shall forego the excess generation and reduce the output to the contract capacity and shall be required to pay the penalty/charges in case of failure to do so. The SPG shall install adequate protection equipment at the interconnection point to avoid excess energy feeding into the grid and failure to do so shall entitle DISCOM to not pay for the additional energy over and above the contracted capacity.

3.1.5. Generation compensation for Off-take constraints

- a. Generation Compensation in offtake constraints due to Grid Unavailability: During the operation of the plant, UGVCL shall endeavor to ensure **95% of grid availability** in a contract year, however, there can be some periods where the Project can generate power but due to temporary transmission unavailability, the power is not evacuated, for reasons not attributable to the SPG. In such cases, subject to the submission of documentary evidences from the competent authority, the generation compensation shall be restricted to the following and there shall be no other claim, directly or indirectly against UGVCL:

Duration of Grid unavailability	Provision for Generation Compensation
Grid unavailability in excess of 5% in a contract year as defined in the PPA (only period from 8 am to 6 pm to be counted):	<p>Generation Loss = [(Average Generation per hour during the Contract Year) × (number of hours of grid unavailability during the Contract Year)] Where,</p> <p>Average Generation per hour during the Contract Year (kWh) = Total generation in the Contract Year (kWh) ÷ Total hours of generation in the Contract Year.</p>

The excess generation beyond 19% CUF by the SPG equal to this generation loss shall be procured by UGVCL at the PPA tariff so as to offset this loss in the succeeding 3 (three) Contract Years.

- b. Offtake constraints due to Backdown: In the eventuality of backdown, subject to the submission of documentary evidences from the competent authority, the SPG shall be eligible for a minimum generation compensation, from UGVCL, restricted to the following and there shall be no other claim, directly or indirectly against UGVCL.

Duration of Backdown	Provision for Generation Compensation
Hours of Backdown during a monthly billing cycle.	<p>Minimum Generation Compensation = 100% of [(Average Generation per hour during the month) X (number of backdown hours during the month)] X PPA tariff Where,</p> <p>Average Generation per hour during the month (kWh) = Total generation in the month (kWh) ÷ Total hours of generation in the month</p>

The SPG shall not be eligible for any compensation in case the Backdown is on account of events like consideration of grid security or safety of any equipment or personnel or other such conditions. The Generation Compensation shall be paid as part of the energy bill for the successive month after JMR.
